Also have experience as Production Crew with Loughborough Students' Union and as Executive Producer of Match Report with LSUTV.

SKILLS

Technical

JS & React
PHP
ElasticSearch

Soft

Team work
Problem solving
Communication

EXPERIENCE

MONITORING DEVELOPER • SKY • 2017-PRESENT

In this role I work with the Alerting Team within Monitoring Solutions to develop bespoke systems for monitoring and alerting across the Sky estate.

My work focuses on providing services to allow other teams within Sky to manage their integration with the alerting team. Current technologies include PHP, React, MySQL and ElasticSearch.

FLIGHT PHYSICS INTERN • AIRBUS • 2015-2016

My DIS placement year was completed in the Methods and Tools department of Airbus. My main project during this placement was the exploration of new methods to calculate wave drag for standard Airbus aircraft. The main aspects of this project were:

- Understanding the existing methods and the physical factors behind the phenomena
- Working independently to develop, implement and evaluate theories
- Presenting findings to key stakeholders including project managers and technical experts

Other tasks included

- Planning and advertising of department wide social activities
- Development and training of department "Wiki" in line with the needs of colleagues
